

Biotinylated Human BAFF Protein; His-Avi Tag

Product Information

Product Name	Biotinylated Human BAFF Protein; His-Avi Tag
Storage temp.	Store at $\leq -70^{\circ}\text{C}$, stable for 6 months after receipt. Recommend to aliquot the protein into smaller quantities for optimal storage. Please minimize freeze-thaw cycles.
Catalog# / Size	GM-87736RP-25 / 25 μg GM-87736RP-200 / 200 μg

Protein Information

Alternative Names	TNFSF13B,BAFF,BL YS,CD257,DTL,TALL1,THANK,TNFSF20,ZTNF4
Source	Biotinylated Human BAFF Protein; His-Avi Tag (GM-87736RP) is expressed from human 293 cells (HEK-293). It contains AA Ala134-Leu285 (Accession # Q9Y275-1). This protein carries a His-Avi tag at the N-terminus.
Purity	> 95% as determined by SDS-PAGE
Endotoxin	< 1 EU/ μg , determined by LAL gel clotting assay
Predicted Mol Mass	19.2 KDa
Formulation	Supplied as a 0.2 μm filtered solution of PBS, pH7.4.
Description	<p>BAFF (B-cell activating factor, also known as TNFSF13B) is an important cytokine that belongs to the tumor necrosis factor superfamily (TNF superfamily). It is crucial for the development, survival, and activation of B cells. BAFF is primarily secreted by plasma cells, dendritic cells, and other immune cells, playing various immunological roles.</p> <p>BAFF binds to BAFF receptors on the surface of B cells, promoting their maturation and survival, particularly in the maintenance of peripheral B cell populations. BAFF not only affects B cells but can also stimulate T cells in certain contexts, thus participating in the overall regulation of the immune response. Overexpression of BAFF is linked to several autoimmune diseases, including systemic lupus erythematosus (SLE) and rheumatoid arthritis, as it enhances the survival and activation of autoreactive B cells. BAFF plays important roles in the pathogenesis of various infections and tumors.</p> <p>In summary, BAFF is a key cytokine involved in the regulation of B cell functions and is closely linked to various disease states. Its study aids in developing new therapeutic strategies.</p>

Version:3.3

SDS-PAGE

On SDS-PAGE under reducing (R) condition. The gel was stained overnight with Coomassie Blue. The purity of the protein is greater than 95%.

Bioactivity-ELISA

Bioactivity-ELISA

0.1 μ g Biotinylated Human BAFF Protein; His-Avi Tag of per well

Biotinylated Human BAFF Protein; His-Avi Tag (Catalog # GM-87736RP) was immobilized at 1 μ g/ml (100 μ L/well) on streptavidin precoated. Increasing concentrations of Anti-BAFF hlgG1 Antibody (belimumab) (Catalog # GM-87690AB) were added.
